decolite

the art of etched glass for a fraction of the cost

The distinctiveness of etched glass has been used to enhance interior settings for centuries. But beauty comes with a price – etched glass can cost up to \$125 per square foot and may not be practical for most applications.

There is a solution – *decolite* from Madico. At a surprisingly affordable cost, these decorative window films retrofit existing glass to appear etched. A wide array of classic and elegant patterns is offered to compliment any décor from boardrooms to ballrooms.

Best of all, *decolite* comes to you from a company you can trust – Madico. For decades, Madico film has graced countless windows of distinction worldwide, including those of the Metropolitan Museum of Art, Le Louvre, the Smithsonian, and the Christian Dior Boutique.

Why decolite is always appropriate for any setting:

- *Adds privacy.* Allows for plenty of light while offering private surroundings. Perfect for office partitions, bathrooms, sun porches, front doors, conference rooms, banks, restaurants, and health clubs.
- *Enhances design.* Adds panache to compliment furnishings, wall treatments, and the overall aesthetics of any design.
- *Increases safety.* Helps hold glass together to lessen the likelihood of flying shards during natural and man-made disasters. Protects against “smash-and-grab” thefts. Also improves visibility of sliding glass doors.
- *Rejects ultraviolet radiation.* Screens up to 98% of damaging ultraviolet rays, thereby decreasing interior fading.
- *Cuts glare.* Softens harsh sunlight and reduces annoying glare.
- *Scratch resistant.* Acts as a scratch-resistant barrier for the glass it embellishes.
- *Easy maintenance.* Cleans with soap and water as well as with common commercial cleaners.
- *Inspired patterns, always in vogue.* A full palette of patterns is offered to match your preferences and applications. As styles change, *decolite* changes with them at a significantly lower cost than if you had to replace etched glass.

decolite works with light to create privacy and lend distinctiveness to any setting. These are but a few of the patterns available.

Installed by professionals, backed by a manufacturer's warranty.
